

Yes, I do post authoritative PDFs explaining the “Fundamentals of Lithography” me-thinks you prefer receiving the misinformation provide by the “**Clairvoyants readings of the Tea Leaves**” posted on this forum. So many times the “experience” posted on this forum in my estimation shows a woeful lack of knowledge of lithography also paper/ink making and the reproduction processes.

#### A Brief Resume-

50 years of experience in Lithographic Printing in the UK, severed a 6 year apprenticeship in Sheet Fed Commercial Printing, attended a leading UK Technical School of Printing, my career progression in printing includes experience in Coldset/Heatset Web Offset becoming Pressroom Operations Manager of a leading UK Newspaper.

To all who read this, I suggest you emblazon on the delivery end of the press the following –

“From knowledge to competence is a great step—from ignorance to competence an even greater one”

Regards, Alois
