

## **FountMax Green 10.90 Q7 SG**

**PX1090-18****Standard fountain solution for coldset printing**

### **KEY CHARACTERISTICS**

- Suited for all water qualities
- Dosage : 2 – 3 %
- Suited for all dampening systems
- Recommended pH value : 6.8 – 7.2
- Fountain solution for IPA-free printing
- Approved by the major press manufacturer
- Density : 1.050 g/ml
- Colour : green

### **PACKAGING**

1000 kg IBC  
200 kg plastic drum  
230 kg plastic drum  
27 kg jerrycan

### **FEATURES AND BENEFITS**

#### **Stable ink/water balance**

- Consistent print quality
- No over-emulsification
- Wide printing latitude

#### **Avoid calcium build up on roller and blankets**

- Reduced standstills
- Increased production

#### **Quick start up**

- Reduced paper waste
- Cost savings

#### **Optimised corrosion protection**

- Avoids corrosion
- Longer press life

### **INSTRUCTIONS FOR USE**

Clean the dampening circuit before using the fountain solution.

Set the dosing equipment for correct dosage of the fountain solution.

After completion and circulation through the system, check for pH and conductivity and compare with the target concentration values.

### **TRANSPORT & STORAGE**

Store at room temperature with container tightly closed when not in use in a cool, ventilated area.

Protect from direct sunlight and keep away from heat sources.

For details about health and safety, please consult the MSDS.

### **RECOMMENDED AUXILIARIES**

Water rehardener : for optimum water quality .

System cleaner : for optimized maintenance of your fount circulation system .

Dampening roller cleaner : to ensure good water transport from dampening tray to printing plate

Deglazer gel : to deglaze rollers and blankets from calcium build up coming from paper, ink & water.
