SECTION 4: FIRST-AID MEASURES

4.1 Inhalation:

- Move the victim into the fresh air, keep him or her warm and quiet, cover with a blanket, and send for immediate medical assistance.
- If the victim is not breathing or is breathing very weakly, loosen his or her clothing in order to secure an airway and begin artificial respiration.
- If the casualty is unconscious, but breathing, or is conscious but experiencing breathing difficulties, the provision of oxygen is effective. It is preferable to do this under medical supervision.
- No medicine other than oxygen may be dispensed. No food may be given to the victim without the physician's direction.

4.2 Skin Contact:

- If it is spilled on the skin, wash off with copious amounts of soap and water.
- Remove the contaminated clothes, shoes, etc., immediately. Cut the clothing off if necessary. Subsequently, rinse the skin with cool or tepid running water for at least 30 minutes.
- Immediate medical attention is required.

4.3 Eye Contact:

- If a contact lens is in place, remove it and wash the eye with warm running water for at least 15 minutes, unless the lens is firmly attached to the eye. Use physiological saline if it is readily available.
- Do not stop rinsing the eye. During the rinse, open the eyelid with your fingers so that water can reach under the eyelid. Send for an ophthalmologist immediately. An ophthalmological examination is absolutely essential because the possibility exists that there may be after effects even if there are no immediate pain or vision problems.

4.4 Ingestion:

- If it is swallowed, call a doctor immediately.
- Do not attempt to make the victim vomit.
- Rinse the mouth out thoroughly with water.
- Give the casualty 1-2 glasses of water to dilute the quantity of the substance in the stomach. (If milk is readily available, this can be given to the casualty after the water.)
- If the victim vomits of his/her own accord, bend his/her body so as to prevent vomit from entering the lungs. After vomiting, allow the victim to drink more water. Keep the victim warm and send for a doctor immediately and show SDS or label.

4.5 Likely Acute or Delayed:

- None

4.6 Note to Physician:

- None.

4.7 Protection of First-Aid Provider

- First-aid personnel should wear personal protection equipment when assisting the casualty.

SECTION 5: FIRE-FIGHTING MEASURES

5.1 Suitable Fire-Extinguishing Media:

- Foam (alcohol-resistant foam), powder and carbon dioxide are effective fire-extinguishing agents.

5.2 Unsuitable Extinguishing Media:

- Do not use water in a jet.

5.3 Hazardous Combustion Products

- Smoke, fume, oxides of carbon.

5.4 Special Protective Actions for Fire Fighters:

- Cool the container(s) surface that is exposed to fire by spraying the surface with water.

- When fighting the fire, wear protective equipment (i.e., self contained breathing apparatus, respiratory masks, chemical protection suit, gloves, boots, goggles, etc.) as needed to avoid inhaling and/or skin contact with the chemical substance. Extinguish from the upwind direction.
- Container may explode when heated. Sensitive to static discharges.

SECTION 6: ACCIDENTAL RELEASE MEASURES

6.1 Personal Precautions, Protective Equipment, and Emergency Measures:

- Shut off or remove all ignition sources if without risk.
- Wear protective equipment (i.e., self contained breathing apparatus, respiratory masks, chemical protection suit, gloves, boots, goggles, mask, etc.) as needed to avoid inhaling and/or skin contact with the chemical and/or vapours, if any. Work upwind, if possible.
- See Section 8 of this SDS for Personal Protective Equipment.

6.2 Environmental Precautions:

- Do not allow to enter drains, sewers or water courses.
- The chemical substance in question should not be released into the environment (water, soil).

6.3 Spill Containment and Cleaning Up:

Minor Spills

- Avoid chemical contact by using personal protective equipment.
- Clean up spills immediately.
- Contain and absorb spill with sand, earth or other suitable absorbent material.
- Place spilled material in clean, dry, sealable, labelled container for disposal.

Major Spills (>155 gallon / 210 liter drum)

- Clear area of personnel and move upwind.
- Call SCDF or local Fire Brigade.
- Wear full body protective clothing with appropriate respiratory masks (including self contained breathing apparatus).
- Prevent, by any means available, spillage from entering drains or water course.
- Stop leak if safe to do so.
- Contain spill with sand, earth or other suitable absorbent material.
- Collect recoverable product into labelled containers for recycling.
- Neutralise/decontaminate residue.
- Collect solid residues and seal in labelled drums for disposal.
- Wash area and prevent runoff into drains.
- Transfer by mechanical means such as vacuum truck for recovery or safe disposal
- After clean up operations, decontaminate and launder all protective clothing and equipment before storing and re-using.
- If contamination of drains or waterways occurs, advise local Environmental Agency or Authority.

SECTION 7: HANDLING AND STORAGE

7.1 Precautions for Safe Handling:

- Limit all unnecessary personal contact.
- Wear protective clothing when risk of exposure occurs.
- Use in a well-ventilated area.
- Avoid contact with incompatible materials.
- When handling, DO NOT eat, drink or smoke.
- Keep containers securely sealed when not in use.
- Avoid physical damage to containers.
- Always wash hands with soap and water after handling.
- Work clothes should be laundered separately.
- Use good occupational work practice.
- Atmosphere should be regularly checked against established exposure standards to ensure safe working conditions are maintained.
