

# XtraMax Water Flow S85

Concentrated water additive to be used in the automatic washing unit

## KEY CHARACTERISTICS

- Specific density: 1,0115 g/ml
- Dosage: 5 %
- Water based
- For sheetfed, heatset and coldset application
- Protects against corrosion

## PACKAGING

1000 L IBC  
600 L IBC  
200 L plastic drum  
25 L jerrycan  
4 x 5L jerrycan

## INSTRUCTIONS FOR USE

Add 5 % to the water circuit. Can be used for all cleaning systems with a separate water tank.

## TRANSPORT & STORAGE

Protect against extreme weather conditions.  
Do not store at temperature above 35 °C or below -10 °C.  
Take all necessary precautions to avoid environmental pollution due to accidental leakage.

## FEATURES AND BENEFITS

### Contains a corrosion inhibitor

- Prevents corrosion of all metal system parts

### Low dosage

- Economical in use

### Reduces surface tension

- Prevents dripping
- Improved wetting of the blanket
- Easy removal from paper dust
