

# CMYK Colour Reference

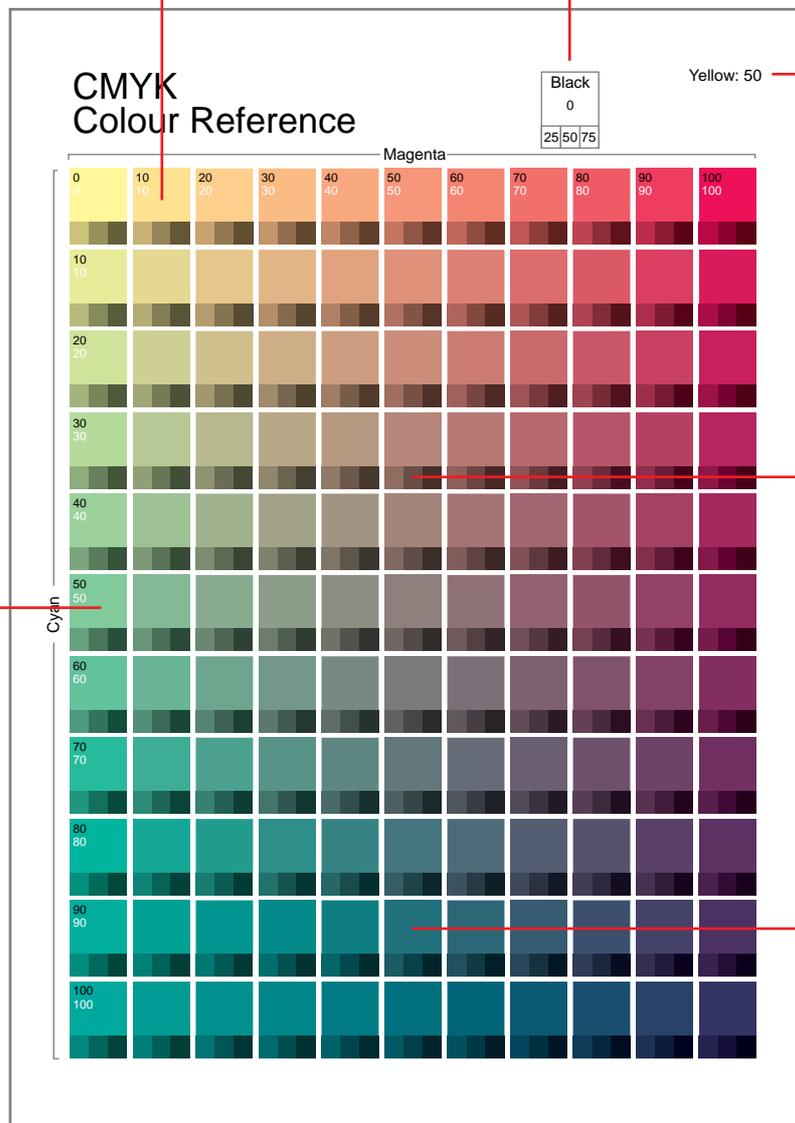

## Overview

This guide is mainly intended as an 'idealised' process colour reference. These ink combinations do not take Total Ink Limits into account – for example, SWOP calls for a TIL reading of 300%. Common TIL readings often range from 280-340% for printing in good conditions.

Horizontal axis colour display.

Magenta increases in 10% increments Example: 10% Magenta.

Black component indicator. 0, 25, 50 and 75% steps.

Yellow component indicator. Each page increases in 10% steps.

Example CMYK process colour swatch. 30% C 50% M 50% Y 50% K

Example CMY process colour swatch. 90% C 50% M 50% Y
