

FOR SALE
ECRM VR36 IMAGESETTER

14" wide, roll-fed Imagesetter
Includes two 12" and two 14" take-up cassettes
ECRM RIP v5.1 for Mac & dongle included
(Upgrade to current version 7.2 available)

This machine has been upgraded with stainless steel rollers, which provide process-color registration to within 0.001" on film output up to 42" long.
It can also image onto polyester plate material.

If your shop does not have digital output capability this is an ideal, rugged starter machine.
