

# **XtraMax Retarder SG**

**PXRESG-79****Retarder / cleaner for waterbased ink duct overprint varnish**

## **KEY CHARACTERISTICS**

- Strong cleaning power
- Low odor
- High boiling
- Slow evaporation
- Water miscible
- Appearance : clear & colourless liquid
- SG : 0.940 – 0955 g/ml @25°C

## **FEATURES AND BENEFITS**

### **For ink duct coatings**

- Start up aid
- Refreshing of skin-dry coating
- Drying retarder
- Coating tack reducer

## **PACKAGING**

1L Bottle  
5L Jerry can

## **INSTRUCTIONS FOR USE**

Pour product into spray bottle and use.

Product can be sprayed on to the rollers to ensure clean start-up.

When the press stops for a short while, product can be sprayed onto ink rollers and ink duct to prevent skinning. During wash up of the rollers, product can be sprayed onto the rollers and ink duct.

For tack reduction, product should be added in small amounts at a time to the ink duct varnish.

Avoid product contact with plate as images would be removed.

## **TRANSPORT & STORAGE**

Store at room temperature with container tightly closed when not in use in a cool, ventilated area.

Protect from direct sunlight and keep away from heat sources.

For details about health and safety, please consult the MSDS.
