

# **CoatMax UV 60.02 HG SG**

**PX6002-73****UV-curable high gloss coating**

## **KEY CHARACTERISTICS**

- Suited for inline on UV ink
- Suited for offline on conventional ink and water based primer
- For board and paper
- Good scratch resistance
- Specific gravity : 0.90 – 1.10
- Curing : 80-82 W/cm depending on lamp power and press speed
- High reactivity
- Hot foil stamping : not recommended
- Gluing : not recommended
- Viscosity : 160 – 200 cps, 25°C

## **FEATURES AND BENEFITS**

- High gloss degree
- Low smell formula
- Non-yellowing

## **PACKAGING**

20 kg

## **INSTRUCTIONS FOR USE**

Stir well before use

Dilution : Not recommended

Cleaning : With adequate UV-cleaner

## **TRANSPORT & STORAGE**

Store at room temperature with container tightly closed when not in use in a cool, ventilated area.

Protect from direct sunlight and keep away from heat sources.

For details about health and safety, please consult the MSDS.
