

- Sometimes the customer is not satisfied with 4c grey printout.
 - Workaround: Change of C6500 Dot 2 screening
 - Utility - Machine Admin. Setting - Systemsetting- Expert Adjustment - Quality Adjustment - Custom Screen
 - Line 2 / Dot 2 Type 1 --> Type 2
 - After change proceed with:
 - Auto Gamma Adjustment
 - Printer Gamma Offset Adjustment Manual for Line 2 / Dot 2
 - Calibrate Controller
 - Eventually create new ICC output profile
- After switching to Type 2 setting customer can choose to print as usual by using Line1 / Dot 1 screening and has the choice to print with other screening now.
