## JUST NEWS 01 / 2010

**JUST setting standards.**

### **JUST NORMLICHT SOLUTIONS RECEIVE FOGRA CERTIFICATION**

Weilheim/ Teck, (January 2010) - Just Normlicht, global leader of standardized lighting solutions for critical colour assessment of hardcopy prints and proofs as well as softcopies displayed on a colour monitor, announced today that altogether 5 different JUST NORMLICHT standardized lighting solutions have been certified by FOGRA based on the ISO 3664:2000 P1 and P2 criteria. Additionally, the new JUST LED Color Viewing Light has already been certified based on the ISO 3664:2009 P1 criteria.

This certification reiterates JUST NORMLICHT's commitment to develop and manufacture innovative, state-of-the-art lighting solutions to help the whole graphic arts industry to achieve consistent colour viewing conditions throughout their different work places. It also greatly assists all parties involved in FOGRA based PSO certification, because those solutions listed below do not require separate certification, but pass the PSO criteria by the general FOGRA certification.

Conformity with ISO 3664:2000 P1:

- proofStation 20 SP
- proofStation 20
- Virtual Proof Station
- ColorCommunicator

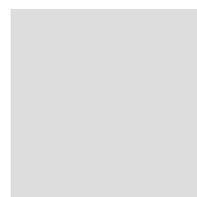

Conformity with ISO 3664:2000 P2:

- moduLight

Conformity with ISO 3664:2009 P1:

- LED Color Viewing Light
