

Kompac®

NOTHING COMPARES

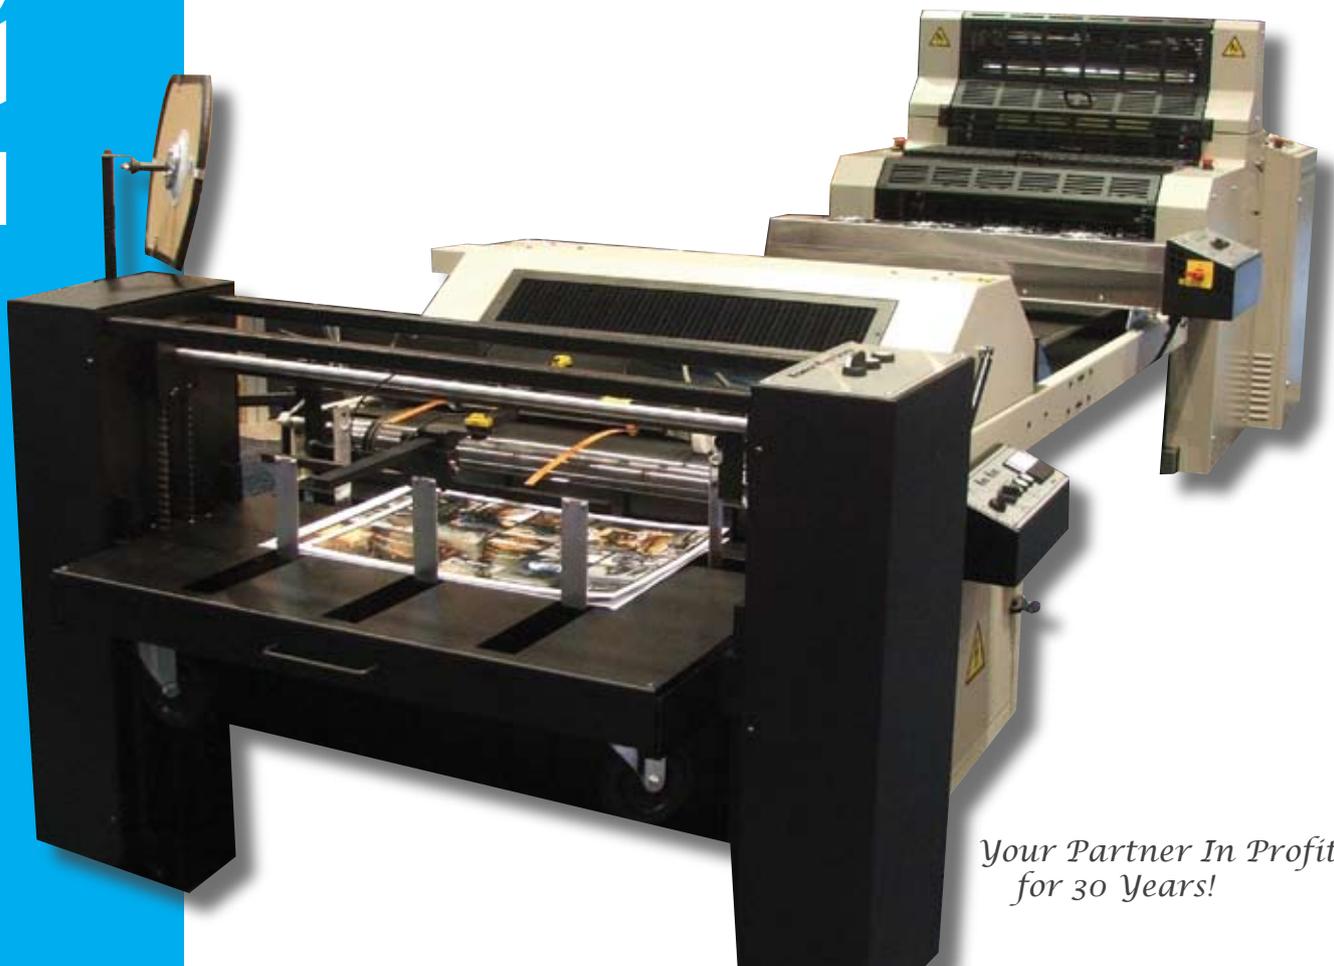

TO THE

KOMPAC

KWIK FINISH

UV/SAPPHIRE/AQUEOUS/SPECIALTY COATING & CURING SYSTEM

- **SPOT COAT & FLOOD COAT**
 - **THIN SUBSTRATES, NO PROBLEM!**
- **AUTO FEEDER (STANDARD)**
 - **5500 SHEETS PER HOUR**
- **OPTIONAL STACKER & IR DRYER**
 - **ONE STOP SHOPPING FOR EVERYTHING YOU NEED TO SUCCEED IN COATING!**

*Your Partner In Profit
for 30 Years!*

The **Kompac Kwik Finish** is an exciting offline coating and curing system, providing a quick and easy way to apply UV, Sapphire, Aqueous & Specialty Coatings to a wide variety of substrates. From onion skin to plastics; whether digital output or offset, each job will have the visual appeal, lasting durability, protection and rub resistant finish that your customers expect!

- Flood & spot coat as well as spot not coat (allowing areas to be free of coating), encouraging enhanced finishing capability and assisting with variable data printing
- Apply UV, Sapphire, aqueous & specialty coatings with one system!
- Easy to setup & operate
- 5 minute coating change and clean up (with the patented Kompac Vac)
- Auto level pump & sensor (Automatically replenishes coating when it is low)
- Patented Kompac Air Delivery System provides 'non-contact' delivery of the coated sheet
