Apple Mac OS 10.9 (Mavericks) compatibility update for Kodak production planning and workflow software

Answer ID 69218 | Published 2014-03-12 08:40 PM GMT | Updated 2014-04-21 05:55 PM GMT

Always check the Release Notes of the products you have installed before upgrading to newly released operating systems. See the table below for an overview of Kodak applications that have been qualified for Mac OS X 10.9.x (Mavericks).

Kodak software	License type (if applicable)	Versions qualified for Mavericks	Comments
Prinerity Workflow (incl. the Workshop and Workspace user interfaces as well as the ColorFlow and Preps Client)		6.0.4 and later	Earlier versions of Workshop cannot be installed on Mac OS X 10.9.x, but will continue to work if installed prior to upgrading to Mac OS X 10.9.x.
Prinerity Evo Client		6.0.6.0 and later	
Preps	floating license	7.0.2 and later	Note: Preps 6.3 can be run on Mac OS X 10.9.2, but is not officially supported.
	dongle-based license	-	The Preps dongle driver is not compatible with Mac OS 10.9.x. Do not upgrade!
Packaging Layout Automation (PLA) Client		1.8 and later	
Pandora	floating license	3.2 and later	
	dongle-based license	-	The Pandora dongle driver is not compatible with Mac OS 10.9.x. Do not upgrade!
TIFF Assembler Plus (TAP)		2.8.2.2 and later
