

## FISH IDENTIFICATION PHOTOGRAPHS

### Anemonefish

Australian Anemonefish  
*Amphiprion rubrocinctus*

Distinctive red colour with white band behind the head.

Australian Anemonefish  
*Amphiprion rubrocinctus*

Some fish have a less prominent white band behind the head.

Clark's Anemonefish  
*Amphiprion clarkii*

Yellow tail and pectoral fins with two white bands on the body.

### Angelfish

Blue Angelfish  
*Pomacanthus semicirculatus*

**Adult** - Fairly large fish with distinctive yellow lips and blue colouring.

Blue Angelfish  
*Pomacanthus semicirculatus*

**Subadult** - Lines fading and colour becoming mottled.

Blue Angelfish  
*Pomacanthus semicirculatus*

**Juvenile** - Distinctive blue and white semicircle lines. As the fish matures the lines slowly disappear and merge into the mottled colour of the adult.
