

Nomenclature

Gentlemen and Cementary, not forgetting Dan T. Roll,

- 1) The correct nomenclature is – Ink Abrasion/ Scuffing, not Carboning !
- 2) If you are confident that the Ink is Dry – not just surface dry? Then we need to move into the Bindery Operations area and ask are they responsible for the Ink Abrasion/Scuffing problem? I suggest you read a previous post of mine <http://printplanet.com/forum/postpress-binding-and-finishing/postpress-binding-and-finishing-discussion/20121-blade-pitch>

FAO – Dan T. Roll

“Breviter et commode dictum”

Regards, Alois
