

4.5.3	Polychrome Winner developer (926)	19
4.5.4	Polychrome WRN developer (982)	19
4.5.5	S. D. Graphics Lithojet NA developer	20
4.5.6	Cornerstone Aluneg developer	20
4.5.7	Fuji FNM & FNS developer (DN-3C)	21
4.6	Analysis of plate developers	22
4.6.1	Odour of developers	22
4.7	Visible image	23
4.8	Resistance of image to solvents	23
4.9	Press performance	23
5.0	Discussion of results	30
5.1	Plate exposure	30
5.2	Contrast of the photosensitive coating	31
5.3	Image resolution	31
5.4	Exposure latitude	32
5.5	Plate processing	33
5.5.1	Plate development	33
5.5.2	Hazardous nature of developers	34
5.5.3	Visible contrast of image	35
5.6	Resistance of image to solvents	36
5.7	User survey	37
5.7.1	Run length	37
5.7.2	Dampening latitude and clean running	38
5.7.3	Resistance to marking and blinding	38
6.0	Conclusions	40
6.1	Plates developed by water only	40
6.2	Plates developed with water-based developers	41
7.0	References	44
Appendix 1	Swedish classification system for chemical products used in the printing industry	54
Appendix 2	Questionnaire forms	56
Appendix 3	Plate and chemical costs	58
8.0	Health & Safety
