

Unit designed to accept the Royse Alco-Miser for effective alcohol monitoring and control

Standard totally enclosed Royse pump with unique power drain and flow characteristics. Two pump system also available for web and special installations.

Detachable lid to enable easy access to reservoir.

Level control (optional) for automatic filling and control of reservoir level.

Stainless steel cooling coil in reservoir ensuring efficient and accurate temperature control. Design ensures rapid pull down and quick press ready solution.

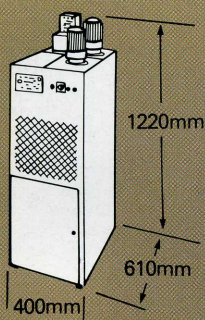

Contoured tank shape for easy cleaning and draining.

Full flow filter with replaceable elements for effective foam control and to minimise ink contamination.

Totally enclosed electrical panel for contactors, overloads etc. and facility for transformer mounting for non-standard voltages and/or safety requirements.

European manufactured condensing unit with easy access panels for any maintenance.

Five gallon/20 litre safety can for safe alcohol storage. located on swivel panel wired for low alcohol alarm at one gallon.

Reservoir capacity

35 Litres

Flow-return connections

12mm $\varnothing$

Compressor capacity

at 32°C ambient

0°C evaporating 1130K.cal/hr

Electrical Supply

200-250/50/1PH

Power consumption

0.8Kw/6.0A

Packing details

Weight 125 Kgs Size 800x585x1525mm
