period of six months felt reduced tenderness and improved joint health. It's also a rich, natural source of *glucosamine* and *chondroitin sulfate*.

■ **Chondroitin Sulfate:** Chondroitin, or *chondroitin sulfate*, is part of a protein molecule that provides elasticity to bone cartilage. It holds water and nutrients in cartilage and giving it structure. You probably know that chondroitin helps provide a cushion for your joints so you can walk and run with ease. It also helps block bad enzymes that actually “eat” cartilage.

Healthy levels of chondroitin sulfate helps protect cartilage from further damage, improve flexibility, and strengthen all your joints

■ **Glucosamine Sulfate:** Scientists refer to glucosamine as an essential “building block” for good joint health, since it's a vital component for the repair and growth of new cartilage. It's been shown in over 300 studies to actually build joint cartilage. Glucosamine also stimulates the manufacture of connective tissue, the primary substance of the cartilage pad which cushions the joints.

Young, healthy joints usually produce their own supply of glucosamine. But as we age, production slows. Less glucosamine means less natural repair power for cartilage and joints. The result? Aches, swelling, and inflammation that tends to get worse over time

■ **Hyaluronic Acid:** Hyaluronic acid is a water-gelling molecule that acts as a shock absorber for your joints. It's found in the

**So powerful, it's patented!**  
**The *only* collagen complex  
of its kind backed by 3 U.S. patents**

**Rejuve-A-Joint** contains a brand new, highly-absorbable form of collagen, called *Biocell Collagen II*®. Derived from the sternum cartilage of young chickens, it contains the ideal amounts of natural Type II collagen, glucosamine, chondroitin, and hyaluronic acid—the ideal foundation for rejuvenating the health of your joints. Chicken cartilage is molecularly similar to human cartilage, so it works gently, with your body.

Keep in mind that a company can't earn a patent from the U.S. government unless its ingredients and manufacturing process are supported by credible scientific research. In fact, the unique collagen complex you get in **Rejuve-A-Joint** is the only clinically-studied and patented compound of its kind available.

Not only that, it's absorbed at a rate 7,008% higher than other supplements as shown in scientific testing. **That's 70 TIMES more absorption power!**

**Rejuve-A-Joint** gives your body exactly what it needs to build brand new joints! Call 1-800-423-1231 to order your Risk-Free trial supply today—plus receive up to 3 FREE GIFTS worth hundreds of dollars.
